

Web Design Training Course, Dublin

Course Overview

This Web Design training course is part-time and runs in the evening over two five week terms. Training is delivered in Ballyfermot, Dublin 10.

The course is aimed at those who are considering a career in Web Page Design. Course content includes:

- HTML 5 and CSS 3
- Dreamweaver and Notepad ++
- Web site planning, design and construction
- W3C and web standards
- Hosting a web site
- Mobile Device web page design - introduction
- Blogs and using WordPress themes - introduction

The main focus of the course is on web page layout and styling using HTML 5 and CSS 3. Learners create multiple web sites (single and multi-page), both in class and at home, through guided tasks and projects.

The applications used on the course are Dreamweaver, a WYSIWYG application, and Notepad ++, a text editor.

Pre-Requisites

To be able to participate fully in the course learners should have:

1. a basic knowledge of HTML and CSS
2. good file management skills (ability to create and copy files and folders)
3. access to the Dreamweaver application at home
4. access to the internet at home

5N1910 - QQI Certification

The certification for this course is the QQI [5N1910](#) "Web Authoring" certification. The aim of the award is to give the learner the knowledge, skill, and competence to effectively use Hypertext Mark-up Language (HTML 5), Cascading Style Sheets (CSS 3), a [WYSIWYG](#) application, and Text Editor in the construction, testing and maintenance of a professional web site.

This is a QQI level 5 single credit award. This module is part of several level 5 Major awards such as eBusiness (5M0828).
